

INSERCCION EN LA BASE DE DATOS DEL USUARIO COMO TAL

The screenshot shows the SQL Server Enterprise Manager interface. The left pane displays the 'Explorador de objetos' (Object Explorer) for the 'WeatherBroadcastingDB' database. The right pane shows the 'SQLQuery1.sql...udiente (57))' window with the following SQL query:

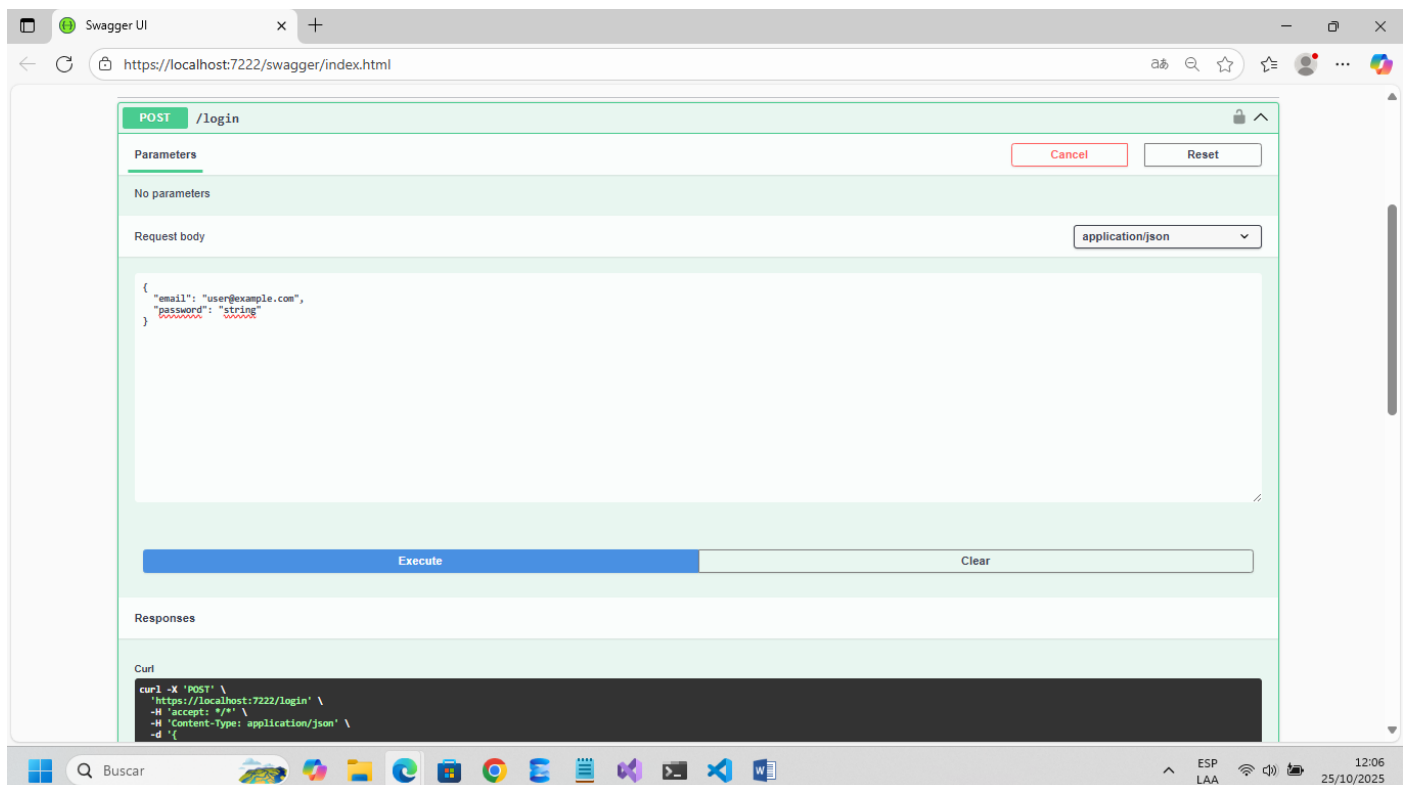

```
1 INSERT INTO Usuarios
2 VALUES('Gustavo', 'user@test.com', '1234');
3
4
5 SELECT *
6 FROM Usuarios
```

The 'Results' pane below the query window shows the output of the query, which is a single row with the following data:

Id	Nombre	Email	Password
1	Gustavo	user@test.com	1234

The status bar at the bottom indicates 'Consulta ejecutada correctamente.' (Query executed successfully).

Verificacion de uso 1

The screenshot shows the Swagger UI interface for a REST API. The selected endpoint is 'POST /login'. The 'Parameters' section is empty. The 'Request body' section is set to 'application/json' and contains the following JSON payload:

```
{
  "email": "user@example.com",
  "password": "string"
}
```

The 'Execute' button is visible, and the 'Responses' section is currently empty. The 'Curl' section at the bottom shows the following command:

```
curl -X 'POST' \
  'https://localhost:7222/login' \
  -H 'accept: */*' \
  -H 'Content-Type: application/json' \
  -d '{
```

Verificacion de retorno2 :

Responses

Curl

```
curl -X 'POST' \
  'https://localhost:7222/login' \
  -H 'accept: */*' \
  -H 'Content-Type: application/json' \
  -d '{
    "email": "user@example.com",
    "password": "string"
  }'
```

Request URL

https://localhost:7222/login
